**RE: Fansteel/FMRI Site, Muskogee, Muskogee County, OK
USEPA Region 6
CERCLA 104(e) Information Request – Request for Extension of Time**

Dear Mr. Nixon:

We have been working on responding to EPA's Request for Information on behalf of Fansteel, Inc. and FMRI, Inc. We continue to work on our responses and have identified a significant amount of documents that need to be produced in response to these questions. We have spoken with Elizabeth Pletan about this. Based upon our discussions and our desire to identify and provide responsive documents, we need additional time to respond. We anticipate submitting a partial response with mostly technical documents by the week of September 4, 2018, and submitting the remainder of our responses, including responsive documents, no later than September 14, 2018.

If you should have any questions with respect to this request for extension, please contact me.

Sincerely yours,

Mark J. Steger
